UNAUDITED INTERIM FINANCIAL REPORT FOR THE THIRD FINANCIAL QUARTER ENDED 31 AUGUST 2019

PART (A): EXPLANATORY NOTES PURSUANT TO MFRS 134

1. Basis of Preparation

This unaudited interim financial report has been prepared in accordance with the reporting requirements as set out in Malaysian Financial Reporting Standards ("MFRS") 134: Interim Financial Reporting and Paragraph 9.22 of the Main Market Listing Requirements of Bursa Malaysia Securities Berhad ("Bursa Securities").

The interim financial report should be read in conjunction with the audited financial statements of the Group for the last financial year ended 30 November 2018 and the accompanying explanatory notes attached to the interim financial report. The explanatory notes attached to the interim financial report provide an explanation of events and transactions that are significant to an understanding of the changes in the financial position and performance of the Company and of the Group since the financial year ended 30 November 2018.

2. Significant Accounting Policies

The accounting policies and methods of computation adopted by the Group in this interim financial report are consistent with those adopted in the audited financial statements for the last financial year ended 30 November 2018, except for the adoption of the new amendments/improvements that are mandatory for the current financial period.

i) Adoption of amendments/improvements to MFRSs

The adoption of the new amendments/improvements does not have any material effect on the financial performance or position of the Group, except for MFRS 9 and MFRS 15 as disclosed below:

MFRS 9 Financial Instruments

MFRS 9 introduces new requirements for classification and measurement, impairment and hedge accounting. The retrospective application of MFRS 9 does not require restatement of 2018 comparative financial statements. As such, the Company have not restated the comparative information, which continues to be reported under MFRS 139. The Company recognised any difference between the carrying amount of financial instruments under MFRS 139 and the restated carrying amount under MFRS 9 in the opening balance of retained earnings (or other equity components) of the annual reporting period including the date of initial application i.e. 1 December 2018.

(a) Classification and measurements

MFRS 9 introduces an approach for classification of financial assets which is driven by cash flow characteristic and the business model in which an asset is held.

(Incorporated in Malaysia)

2. Significant Accounting Policies (Cont'd)

MFRS 9 Financial Instruments (cont'd)

(b) Classification and measurements (Cont'd)

There is no significant impact on the Group's statements of financial position on applying the classification and measurement requirements of MFRS 9. Quoted unit trust and fixed income funds currently classified as available-for-sale ("AFS") will continue to record gains and losses in other comprehensive income ("OCI"). The equity shares in non-quoted companies are intended to be held for the foreseeable future and the Group will apply the option to present its fair value changes in OCI.

Loans and receivables are held to collect contractual cash flows and are expected to give rise to cash flows representing solely payments of principal and interest. The Group has analysed the contractual cash flow characteristics of these instruments and concluded that they meet the criteria to be measured at amortised cost under MFRS 9.

Therefore, the adoption of the new standard did not affect the measurement and classification of its financial assets.

(b) Impairment

MFRS 9 introduces a new, expected-loss impairment model that will require more timely recognition of expected credit loss. In the previous financial year, trade receivables are impaired if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after initial recognition of the receivables (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the receivables ("incurred loss model"). Upon adoption of MFRS 9, the Group is recording expected credit losses on all its trade receivables, either on a 12-month or lifetime basis.

The Group applies the simplified approach to providing for expected credit losses ("ECL") prescribed by MFRS 9, which permits the use of the lifetime expected credit loss provision for all trade receivables. To measure the ECL, trade receivables have been grouped based on the days past due. The Company also individually assessed ECL of individual customers based on indicators such as changes in financial capability of the receivables, payment trends of the receivable and default or significant delay in payments. The determination of ECL also incorporate economic conditions during the period of historical data, current conditions and forward-looking information on the economic conditions over the expected settlement period of the receivables. The Group believes that changes in economic conditions over these periods would not materially impact the impairment calculation of the receivables.

MFRS 15 Revenue from Contracts with Customers

MFRS 15 establishes a new five-step model that will apply to revenue arising from contracts with customers. MFRS 15 will supersede the current revenue recognition guidance including MFRS 118 Revenue, MFRS 111 Construction Contracts and the related interpretations.

The core principle of MFRS 15 is that an entity recognises revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Under MFRS 15, an entity recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

(Incorporated in Malaysia)

2. Significant Accounting Policies (Cont'd)

MFRS 15 Revenue from Contracts with Customers (cont'd)

The Group has applied MFRS 15 retrospectively with the cumulative effect of initial application recognised as an adjustment to the opening balance of retained earnings (or other components of equity) at the date of initial application of 1 December 2018. As such, the comparative information was not restated and continues to be reported under MFRS 111, MFRS 118 and related Interpretations. The Company has elected the practical expedient to apply the standard only to contracts that are not completed as at 1 December 2018.

The adoption of MFRS 15 resulted in changes in accounting policies. Other than the enhanced new disclosures relating to contracts with customers, which the Company has complied with in the current financial year, the adoption of this standard does not have any significant effect on the financial statements of the Company.

The Group has assessed that the impact upon the initial application of MFRS 15 is insignificant as the timing and amount of revenue to be recognised for its infrastructure service construction contracts under the new standard is unlikely to be materially different from its current practices.

Nevertheless, effective from 1 December 2018, the Group has changed the presentation of certain amounts in the Statement of Financial Position to reflect the terminology of MFRS 15, i.e. contract assets/liabilities recognised in relation to infrastructure service construction contracts which were previously presented as part of amount due by/to contract customers.

(ii) Standards issued but not yet effective

The Group has not early adopted any new standards, amendments/improvements to MFRSs which are applicable to the Group that have been issued by the Malaysian Accounting Standards Board but are yet to be effective for the Group's current financial period.

3. Audit Qualification

The audit report of the Group's financial statements for the year ended 30 November 2018 did not contain any qualification.

4. Seasonal or cyclical Factors

The Group's operations are not effected by seasonal or cyclical factors for the current financial quarter under review.

5. Unusual Items

There were no items affecting assets, liabilities, equity, net income, or cash flows that are unusual because of their nature, size or incidence for the current quarter under review.

6. Material Changes in Estimates of Amounts Reported

There were no changes in estimates of amounts reported in the prior financial quarters or changes in estimates of amount reported in prior financial periods that have a material effect in the current financial quarter.

(Incorporated in Malaysia)

7. Debt and Equity Securities.

There is no issuance, cancellation, repurchase, resale and repayment of debt and equity securities for the current quarter and financial period to date.

8. Dividends Paid

There was no dividend paid during the financial period ended 31 August 2019.

9. Segmental Reporting

The Group's segment information for the financial period ended 31 August 2019 is as follows:-

(i) Major Business Segments

The basis of segmentation and measurement of segment performance is consistent with the basis adopted in the last audited annual financial statements.

In the previous financial year, the Company disposed of its entire equity interest in Mewah Amanjaya Sdn Bhd and hence discontinued its property development business. Therefore, the comparative consolidated statement of comprehensive income has been re-presented to show the discontinued operation separately from continuing operations.

UNAUDITED INTERIM FINANCIAL REPORT FOR THE THIRD FINANCIAL QUARTER ENDED 31 AUGUST 2019

PART (B): ADDITIONAL INFORMATION PURSUANT TO APPENDIX 9B OF BURSA SECURITIES MAIN MARKET LISTING REQUIREMENTS

1. Review of Performance

The Group reported a revenue of RM15.20 million and profit after tax of RM0.90 million for the current financial quarter, as compared to revenue of RM12.03 million and profit after tax of RM0.33 million reported in the preceding year corresponding quarter. The increase in revenue and profit was primarily due to sales increase from the ICT segment.

For the nine months ended 31 August 2019, the Group's revenue from continuing operations was RM45.76 million which is approximately 31.7% higher than RM34.74 million reported in the preceding year corresponding period. In tandem with the increase in sales, the Group registered a profit after tax of RM2.80 million for current financial period as compared to profit after tax of RM0.25 million recorded in the preceding year corresponding period. The current period's improvement in revenue and profit was mainly due to higher sales and profit achieved by the ICT segment as a result of increase in the supply of Telematics products and automotive accessories.

The performance of the respective business segment of the Group is summarized as follows:-

ICT Segment

The performance of ICT segment are summarized as per table below:-

		Preceding

1. Review of Performance (Cont'd)

TIS Segment

The performance of TIS segment are summarized as per table below:-

	Current Quarter	Preceding Year Corresponding Quarter		Current Year 9 Months	Preceding Year 9 Months	
-	31/8/2019 RM'000	31/8/2018 RM'000	Changes %	31/8/2019 RM'000	31/8/2018 RM'000	Changes %
Segment revenue Segment profit	2,423	1,790	35.4	5,282	3,710	42.4
after taxation	29	145	-80.0	75	89	-15.7

TIS segment recorded an increase in revenue in the current quarter and period to date as compared to preceding year corresponding quarter and period. This revenue came from progress billings on the completed and on-going civil infrastructure project works. However, despite reported increase in revenue, a lower profit after tax was reported mainly due to less margin achieved as a result of competitive pricing strategies and some start up overheads incurred on certain new projects.

Others Segment

Higher inter-segment revenue was reported in the current quarter mainly due to dividend income received by the investment holding company from the subsidiaries. With intercompanies' dividend eliminated at the Group level, loss posted during the current quarter and period to date was attributed to the operating costs incurred by the investment holding company.

2. Material Changes in the Profit After Tax for the Quarter Reported as Compared with the immediate Preceding Quarter.

The Group's performance for the current financial quarter and the immediate preceding quarter are summarized as follows:-

•	Current	Immediate Preceding	
	Quarter	Quarter	
	31/8/2019	31/5/2019	Changes
Continuing operations:	RM'000	RM'000	%
Total revenue	15,204	16,919	-10.1
Profit before taxation	1,247	1,646	-24.2
Profit after taxation	899	1,172	-23.3

The Group's revenue of RM15.20 million for the current quarter was 10.1% lower than the RM16.92 million reported in the previous quarter. The lower revenue and profit reported during the current quarter was attributed to lower supply of ICT products and related services to automakers. This is mainly due to the lesser production days at automakers' end during the festive month. In addition, there were additional software development costs charged out by the ICT segment as part of our ongoing research and development activities to continuously enhance our Telematics products and at the same time, to explore new technologies.

3. Commentary on the Group's Prospects

The Group will continue to identify new revenue streams, focusing mainly on ICT related products and services which is its core business segment. We will step up investment in new research and development activities as part of the initiatives to enhance existing products and to offer new products and solutions to existing and new customers. The Group will also continue to explore others investment opportunities to widen its earning base and to pursue long term sustainability.

The Board expect sales of ICT related products and automotive accessories to keep up the momentum in the last financial quarter. Thus, the Directors are optimistic about the Group's performance for financial year ending 30 November 2019.
