UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE THIRD QUARTER ENDED 31 AUGUST 2012

(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

1. Review of Performance

The Group generated a turnover and profit before tax of RM13.458 million and RM1.150 million respectively for the current quarter under review as compared to RM14.165 million and RM1.169 million reported in preceding year corresponding quarter. The decrease in turnover for the current quarter as compared to preceding year corresponding quarter was mainly because a subsidiary company has scaled down its operations which has led to a drop in the sales of two-way radio communications products. The marginal drop in current quarter's profit was arrived at after the impairment loss on intangible assets of RM785,000/-. Otherwise, the Group would have posted an improvement in operating results despite recorded a lower turnover mainly due to the profit contribution from the sale of new Telematics software and mapping products.

The Group's turnover for the nine months ended 31 August 2012 amounted to RM41.343 million, which is lower than that of the preceding year corresponding period of RM44.500 million. Despite reported a 7.1% decrease in turnover for the current period caused mainly by the dip in sales of two-way radio communications products, the Group's profit for current period remains unabated due to the substantial increase in revenue and profit reported by the sales of new Telematics software and mapping products. Consequently, the Group registered an improved performance for current period with a profit before tax of RM3.531 million as compared to RM3.041 million reported in preceding year corresponding period. In addition, higher profit contribution from the associated company also contributed to the improved performance for the current period.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

ICT segment continued to be the main contributor to the Group's turnover for the current period, accounted for approximately 98% of the Group's turnover for current period mainly from sales of Telematics and mapping products.

The drop in revenue for the current period as compared to preceding year corresponding quarter was mainly due to the dip in sales of two-way communications products by a subsidiary which has scaled down its operation. However the enhanced performance achieved from the sales of new Telematics software and mapping products during the current quarter and current period leads to the overall growth in current period's performance as compared to preceding year corresponding period.

(Incorporated in Malaysia)

1. Review of Performance (Cont'd)

TIS Segment

Higher revenue was reported by the TIS segment in preceding year corresponding period due to the sales of alternate telephony charges services by a former subsidiary. For current quarter and period under review, the loss posted is within expectation due to lower revenue recorded by the subsidiary engaged in the installation of fiber optic cables and civil works business due to keen market competition.

Others Segment

Lower loss was registered during the quarter and current period mainly due to higher interest and dividend income and lesser operating costs as a result of internal restructuring of subsidiaries engaged in the provisioning of management services to the Group.

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group recorded a profit before tax of RM1.150 million for the current quarter under review as compared to RM0.869 million reported in the immediate preceding quarter. A higher revenue and profit was reported for the current quarter mainly attributed to the sales of new Telematics software and mapping products and increase profit contribution from the associated company, despite the impairment loss on intangible assets of RM785,000/-.

3. Prospects for the Current Financial Year

The Group will continue to enhance its Telematics products and services and broaden its customer base via various assertive marketing strategies that are in place in order to sustain long term growth in revenue and profits. Barring unforeseen circumstance, the Board is confident that the Group will continue to deliver profitable results for its remaining financial quarter.

4. Variances of Actual Profit from Forecast Profit

Not applicable.

5. Taxation

	Current Quarter RM'000	Cumulative Current Period RM'000
Tax expense:-		
Based on results for the period	(1)	(13)
Transfer from deferred tax liabilities	-	-
Transfer from deferred tax assets	-	(361)
	(1)	(374)

The tax charge for the Group reflects an effective tax rate which is lower than the statutory tax rate due to pioneer profits exempted from tax and utilisation of unabsorbed tax losses brought forward in certain subsidiaries.
