UNAUDITED INTERIM FINANCIAL STATEMENTS FOR THE FOURTH QUARTER ENDED 30 NOVEMBER 2012

(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF BURSA MALAYSIA SECURITIES BERHAD

1. Review of Performance

The Group generated a turnover and profit before tax of RM14.223 million and RM2.120 million respectively for the current quarter under review as compared to RM16.914 million and RM1.248 million reported in preceding year corresponding quarter. The decrease in turnover for the current quarter as compared to preceding year corresponding quarter was mainly caused by a subsidiary company having scaled down its operations which led to a drop in the sales of two-way radio communications products. The Group registered an improvement in operating results despite recorded a lower turnover mainly due to higher profit and contribution from the sale of new Telematics products.

The Group's turnover for the year ended 30 November 2012 amounted to RM55.566 million, which is lower than that of the preceding financial year of RM61.414 million. Despite reporting a 9.5% decrease in turnover for the current year caused mainly by the drop in sales of two-way radio communications products, the Group's profit for current year remains unabated due to the significant increase in revenue and profit margin reported by the sales of new Telematics products. Consequently, the Group ended the financial year with a commendable performance which showed a higher profit before tax of RM5.651 million as compared to RM4.289 million reported in preceding financial year. In addition, higher profit contribution from the associated company also contributed to the improved performance for the current year.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

ICT segment continued to be the main contributor to the Group's turnover for the current year, accounted for approximately 97% of the Group's turnover for current year mainly from sales of Telematics products.

The drop in revenue for the current year as compared to preceding financial year was largely due to the drop in sales of two-way communications products by a subsidiary which has scaled down its operation. However the greater performance accomplished from the increase in revenue and profit contribution from sales of new Telematics products leads to the overall improvement in current financial year's performance as compared to preceding financial year.

TIS Segment

Higher revenue was reported by the TIS segment in preceding financial year due to the sales of alternate telephony charges services by a former subsidiary. For current quarter and financial year under review, the loss posted is within expectation due to lower revenue and project margin generated by the subsidiary engaged in the installation of fiber optic cables and civil works business due to competitive market condition.

(Incorporated in Malaysia)

1. Review of Performance (Cont'd)

Others Segment

Loss registered during the current quarter and financial year mainly attributed to the incidental expenses, borrowing costs & building outgoing expenses incurred in connection with the acquisition of the new property located at Glenmarie, Shah Alam by a wholly owned subsidiary.

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group recorded a turnover and profit before tax of RM14.223 million and RM2.120 million respectively for the current quarter under review as compared to RM13.458 million and RM1.150 million reported in the immediate preceding quarter. Lower profit was reported in the preceding quarter due to the impairment loss on intangible assets of RM785,000/-. Otherwise, the Group would have reported a marginal improvement in profit before tax for the current quarter resulting from the increase in sales of Telematics products.

3. Prospects for the Current Financial Year

Going forward, the Group will strategize its resources and business efforts in expanding the profitable ICT business. The Group will continue to assess all potential business opportunities to broaden its customer base and market share for its various Telematics products and services with the objective of achieving long term growth and maximising shareholder value. The work improvement program which was undertaken in early 2012 has seen certain improvement in the operational efficiency and productivity and will continue to be carried out by the Group

Barring any unforeseen circumstances, the Group expects the positive growth to sustain and deliver a satisfactory performance in the next financial year.

4. Variances of Actual Profit from Forecast Profit

Not applicable.

5. Taxation

	Current	Cumulative
	Quarter	Current Year
	RM'000	RM'000
Tax expense:-
