FOR THE SECOND QUARTER ENDED 31 MAY 2015**

**(B) EXPLANATORY NOTES PURSUANT TO MAIN MARKET LISTING REQUIREMENTS OF
BURSA MALAYSIA SECURITIES BERHAD**

1. Review of Performance

For the current quarter ended 31 May 2015, the Group registered a turnover of RM10.98 million and loss before tax of RM0.50 million, as compared to a turnover of RM8.67 million and loss before tax of RM0.44 million achieved in the preceding year corresponding quarter. Loss posted during the current quarter is after accounting for the amortization of goodwill on purchase of subsidiary of RM0.41 million. Otherwise, the Group would have reported an improvement in performance for the current quarter attributed to the revenue and profit contributions from the property development segment and improvement in the results of the TIS segment.

For the current financial period ended 31 May 2015, the Group reported a turnover of RM19.41 million and loss before tax of RM0.83 million, as compared to turnover of RM15.20 million and loss before tax of RM0.94 million achieved in the preceding year corresponding period. The overall improvement in performance was mainly due to the revenue and profit contributions from the property development segment and improvement in the results of the TIS segment during the current financial period.

The performance of the respective segment of the Group is summarized as follows:-

ICT Segment

The increase in revenue during the current period is marginal as compared to preceding year corresponding period. However, the sales of certain Telematics products and services during the current financial quarter were slower after the implementation of GST. Thus this has resulted in loss reported in the current financial period as compared to profit achieved in the preceding year corresponding period.

Property Development Segment

This segment has started to contribute revenue and profit to the Group during the current financial quarter deriving from the sales of residential properties at Laman Sutera, Bukit Lanchong, Petaling Jaya.

TIS Segment

Profit achieved during the current quarter and period was contributed by the increase in turnover generated from higher progress billings recorded by several completed civil infrastructure projects.

Others Segment

Loss reported for the current quarter and period is attributed to the amortization of goodwill on purchase of subsidiary, legal and professional charges incurred on various corporate exercises undertaken by the Group.

AMTEL HOLDINGS BERHAD (409449-A)
(Incorporated in Malaysia)

2. Material Changes in the Profit Before Tax for the Quarter Reported on as Compared with the Immediate Preceding Quarter.

The Group posted a higher loss before tax of RM0.50 million for the current quarter under review as compared to loss before tax of RM0.33 million registered in the immediate preceding quarter due mainly to the amortisation of goodwill on acquisition of subsidiary of RM0.41 million.

3. Prospects for the Current Financial Year

The Group is cautious that the business environment will continue to be competitive and challenging amid the global economic uncertainties and the weakening of the Ringgit against the major currencies. Despite the challenges ahead, the Group will continue with its various cost control measures to streamline its operational processes, strengthening of operational productivity and efficiency in order to mitigate the adverse effect from the increasing costs of materials and overheads.

With the diversification into property development industry, barring any unforeseen circumstances, the Group is cautiously optimistic of achieving satisfactory results for the remaining financial period.

4. Variances of Actual Profit from Forecast Profit

Not applicable.

5. Taxation

The taxation for the Group for the current financial quarter and period under review was as follows:-

	Current Quarter RM'000	Cumulative Current Period RM'000
<u>Tax expense:-</u>		
Based on results for the period	(95)	(162)
Transfer to deferred tax liabilities	74	103
	<u>(21)</u>	<u>(59)</u>

The tax charge for the Group reflects an effective tax rate which is lower than the statutory tax rate due to pioneer profits exempted from tax and non-availability of Group tax relief in respect of losses incurred by certain subsidiaries. The deferred tax expense recognized was relating to origination of temporary differences between the carrying amount of property, plant and equipment and its tax base.
